Server Owners with TECHCUSTOMBots

From:

TechGenius1234

Hello Server Owners,

You are receiving this letter in regards to an update to our Rules and Guidelines.

Please review the following rules and guidelines as they are effective Immediately.

Thank you.

Section A: Server Related

Your server may **not** be the following:

- NSFW/Porn servers
- Middleman scam servers (including and not limited to: cross-game Roblox scams, money trading)
- Scam servers (including and not limited to: NFT scamming, money scams, Robux scams)
- Servers that do not follow Discord's Community Guidelines and Terms of Service

Your server **must allow**:

- The custom Discord bot to have Administrator permissions
- The bot creator/host to have Administrator permissions

Your server **must**:

- Follow these Community Guidelines and all Bot Hosting rules and guidelines
- Have Community mode enabled
- Be inclusive to all members

Section 2: Owner & Staff Conduct

As the server owner or staff member requesting hosting, you agree to:

- Treat the bot creator/host with respect in all communications (tickets, DMs, support requests)
- Not threaten, harass, or attempt to blackmail the host over bugs, downtime, or feature requests
- Not attempt to bypass, jailbreak, decompile, or reverse-engineer the bot
- Not share, resell, or redistribute the bot, its source code, or hosting access without permission
- Not use the bot or its permissions to harm your own members (e.g. mass-banning for personal disputes, abusing admin access granted to the bot)
- Provide accurate information when requesting setup or support (server ID, intended use case, etc.)

Failure to follow these terms may result in immediate bot removal or warning.

Section 3: Bot Usage & Permissions

- The bot's Administrator permission is required for full functionality (moderation, automation, ticket systems, etc.) and **may not be restricted, demoted, or role-locked** without prior approval from the host
- You may not use the bot to spam, raid, mass-DM, or attack other servers or users
- You may not use bot features (logging, moderation tools, data storage) to collect or store user data for malicious purposes
- Custom commands, integrations, or modifications requested must go through the host — do not attempt to self-modify the bot's code or database
- Uptime and feature availability are provided on a best-effort basis; the host is not liable for downtime, data loss, or missed events unless otherwise agreed

Section 4: Content & Safety Standards

- No NSFW, gore, shock content, or content violating Discord ToS anywhere in the server (channels, PFPs, banners, statuses, emojis)
- No hate speech, harassment, discrimination, or targeted attacks against any individual or group
- No promotion of illegal activity (scams, drugs, hacking/cracking tools, piracy, etc.)
- No content sexualizing minors under any circumstance — this results in an immediate and permanent ban from the hosting service, and may be reported to Discord Trust & Safety and/or relevant authorities
- Servers found violating these standards will have bot access revoked immediately, without warning

Section 5: Enforcement & Termination

- The host reserves the right to remove the bot from any server found violating these guidelines, at any time, with or without notice
- Repeated or severe violations (scam servers, ToS violations, abuse of host) result in a permanent ban from requesting future hosting
- Appeals can be submitted via [ticket/DM/contact method] and will be reviewed on a case-by-case basis
- These guidelines may be updated at any time; continued use of the hosted bot constitutes acceptance of the current version
- The host is not responsible for disputes between server owner and server members regarding bot-driven actions (bans, mutes, role changes) taken by staff using the bot's tools

By having this bot on your server, you agree to the following Rules and Guidelines, and agree that your bot may be taken offline at any time, without warning if these guidelines are broken.
